## EDUCATION

---

<b>Massachusetts Institute of Technology</b> <i>M.Eng. Electrical Engineering and Computer Science</i>	May 2025 <i>GPA: 5.00/5.00</i>
<b>Massachusetts Institute of Technology</b> <i>B.S. Electrical Engineering and Computer Science, Minor Mathematics</i>	May 2025 <i>GPA: 4.94/5.00</i>
<b>Milton High School</b> <i>Valedictorian, U.S. Presidential Scholar</i>	May 2021 <i>GPA: 4.00/4.00</i>

## COURSEWORK

**Graduate CS Courses:** Computer Vision, Generative AI for Biology, Sensorimotor Learning, Symmetry and its Applications to ML, TinyML & Efficient Deep Learning

**Undergraduate CS Courses:** Algorithms (I & II), Computational Biology, Embedded Systems, Machine Learning, Natural Language Processing, Programming (I & II), Signal Processing

**Undergraduate Math/Biology Courses:** Biostatistics, Calculus I & II, Differential Equations, Genetics, Linear Algebra, Organic Chemistry, Probability, Statistics

## PUBLICATIONS

---

- [6] **RNAFlow: RNA Structure & Sequence Design via Inverse Folding-Based Flow Matching** 2024  
 Divya Nori, Wengong Jin  
 In *41st International Conference on Machine Learning (ICML)*  
 In *GEM Workshop at the 12th International Conference on Learning Representations (ICLR)*
- [5] **Evaluating Zero-Shot Scoring for *In Vitro* Antibody Binding Prediction** [Paper] 2023  
 Divya Nori, Simon V Mathis, Amir Shanehsazzadeh  
 In *GenBio Workshop at the 37th Neural Information Processing Systems (NeurIPS)* [Spotlight]  
 In *Broad Institute Machine Learning for Drug Discovery Symposium*
- [4] ***De Novo* PROTAC Design Using Graph-Based Deep Generative Models** [Paper, Code] 2022  
 Divya Nori, Connor Coley, Rocio Mercado  
 In *AI4Science Workshop at the 36th Neural Information Processing Systems (NeurIPS)*  
 In *Broad Institute Machine Learning for Drug Discovery Symposium* [Spotlight Talk]
- [3] **Real-Time Intervention Framework for Nicotine Poisoning via Smart E-Cigarette Device** [Paper] 2021  
 Divya Nori, Amanda Martinez  
 In *MIT Undergraduate Research Journal Vol. 42*
- [2] **Automated Detection System for Adolescent Prescription Stimulant Overdose** [Poster] 2020  
 Divya Nori  
 In *9th Southeastern Pediatric Research Conference*
- [1] **AI-Based Early Detection Tool to Identify Linguistic Biomarkers of Mood Disorders** [Poster] 2020  
 Divya Nori  
 In *9th Southeastern Pediatric Research Conference*

## SELECTED AWARDS

---

<b>Eric and Wendy Schmidt Center Funded Research and Innovation Scholar</b>	2023
<b>D.E. Shaw Research Undergraduate Fellowship</b>	2023
<b>Neo Scholar Finalist</b>	2023
<b>MIT EECS Outstanding Undergraduate Research (UROP) Award</b>	2023
<b>Intel International Science &amp; Engineering Fair Grand Award Winner</b>	2021
<b>Regeneron Science Talent Search Scholar</b>	2021

## EXPERIENCE

---

<b>D.E. Shaw Research</b>   ML Research Intern	May 2024 - Aug 2024
<ul style="list-style-type: none"> <li>Developing self-supervised learning frameworks to learn protein-ligand interaction embeddings from large-scale molecular dynamics simulation data for downstream binding affinity prediction</li> <li>Adapted the self-distillation with no labels (DINO) method to learn on molecular voxel grids, focusing on generalizable approaches to robustly learn interactions rather than memorizing ligand identity</li> <li>Compared our approach to multiple baselines including fingerprint-based methods, graph-based methods, etc.</li> </ul>	
<b>Broad Institute of MIT and Harvard</b>   Undergraduate Researcher	May 2022 - present
<ul style="list-style-type: none"> <li>Working on several projects at the intersection of generative modeling, representation learning, and drug discovery</li> <li><b>Project 1 [Ongoing]:</b> Applying sequence-based ML methods to optimize RNA elements for IRES (internal ribosome entry site) function with <i>in vitro</i> validation</li> <li><b>Project 2 [Jan 2023 - Jan 2024]:</b> Led the development of conditional flow matching methods for joint RNA structure and sequence design, conditioned on a target protein of interest</li> </ul>	
<b>Absci</b>   AI Research Intern	May 2023 - Sept 2023
<ul style="list-style-type: none"> <li>Trained and evaluated 8 zero-shot scoring models to predict experimental success of AI-designed antibodies, comparing sequence, apo structure, and docked complex-based methods</li> <li>Gained experience optimizing training, inference, and batched operations on a high-performance cluster</li> </ul>	
<b>Microsoft Research</b>   Software Engineering Intern	Jan 2023 - Feb 2023
<ul style="list-style-type: none"> <li>Contributed to a tool (ProteinHub) for researchers in the biological sciences to easily access and apply state-of-the-art deep learning models for protein engineering</li> <li>Focused on building a generative models module, involving integration of protein structure diffusion models and an autoregressive language model</li> </ul>	
<b>MIT Scharzman College of Computing</b>   Undergraduate Researcher	Jan 2022 - Dec 2022
<ul style="list-style-type: none"> <li>Built a graph-based deep generative model to design protein degrader molecules with predicted potency</li> <li>Applied policy-gradient reinforcement learning (RL) using a multi-objective scoring function to promote the design of structures with predicted protein degradation activity</li> </ul>	
<b>Eli Lilly</b>   Data Science Intern	Jan 2022 - Feb 2022
<ul style="list-style-type: none"> <li>Improved automated approach to identify and classify injection site skin reactions by bench-marking scarletred computer vision model against millions of images from Eli Lilly database</li> </ul>	

## SERVICE

---

<b>Teaching Assistant, Break Through Tech AI Program</b>	May 2024 - present
<b>Reviewer, ICML 2024 AI4Science Workshop</b>	May 2024
<b>Mentor, MIT Women in EECS</b>	Sept 2023 - present
<b>Reviewer, MIT Undergraduate Research Journal</b>	Sept 2021 - present
<b>Teaching Assistant, Intro to Deep Learning (6.S191)</b>	Jan 2024 - Feb 2024
